From: Trevor Hope, Director of Technology

**Date:** January 19, 2017

Re: Information- Technology Strategic Plan Update

#### **Executive Summary:**

As we look ahead, the district will need to continue to invest in technology upgrades, personnel, and professional development in order to meet the strategic objective for Key Success Factor #2 Coherent and Rigorous Programs and Services documented on the District 57 Strategic Plan.

#### **Background:**

The following are key areas of consideration:

#### Infrastructure:

The district's Wide Area Network (WAN) and Broadband contracts are up for renewal on July 1, 2017. Please see administration's recommendation in the Wide Area Network and Broadband Upgrade memo.

The intercom system at Lincoln needs to be replaced. The system is over 20 years old, obsolete and is broken with no parts available. The initial plan was to replace the system entirely at a cost of over \$120,000. Administration is recommending that a new system be installed and be integrated with existing infrastructure to mitigate costs. New estimates bring the project closer to \$34,000 and will work seamlessly with the existing Voice over Internet Protocol (VOIP) phone system already in place as well as with existing intercoms in the other three schools. This project is tentatively scheduled for summer of 2017 and should be completed before the 2017-18 school year.

#### **Devices:**

The need for computers in every classroom continues to grow to support everyday curriculum including exciting STEM initiatives such as coding and 3D printing going on throughout the district. The 1:1 Chromebook initiative at Lincoln has been positive thus far. The district plans to add 6<sup>th</sup> grade to the 1:1 plan in the 2017-18 school year making Lincoln completely 1:1 with Chromebooks.

The district is in the midst of a shift from Macbook Air student devices to Chromebooks for students at Fairview and Lions Park. Over the next two years, Fairview and Lions Park will move to a 2:1 ratio (Student: Chromebook). This will increase availability to all classrooms.

As student devices are transitioned from Apple to Chromebook, staff devices will remain on the Apple platform for the time being. Due to Apple's planned phase out of the Macbook Air product line, administration is planning a switch to a 5-year replacement cycle for staff laptops as opposed to the current 4-year cycle to help control costs. With the phase out of the Macbook Air, staff laptop prices are expected to rise from \$1,000 per device to \$1,600 per device.

#### **Personnel:**

With more computers and technology in the classroom comes the need for added support and professional development. The district currently has .5 FTE technology integration coach at the elementary and primary levels. The .5 FTE coach position requires teacher certification and is shared between Westbrook, Fairview and Lions Park schools. This current configuration does not provide the amount of classroom and instructional support needed to adequately meet the needs of changing curriculums and added technology in every classroom. Administration is recommending the Board approve an increase to 1.5 FTE to allow a .5 FTE technology integration coach, certified staff, position at each elementary school. This increase is reflected in the 2017-18 staffing plan. Lincoln Middle School currently has a 1.0 FTE technology integration coach, certified staff position.

Attached to this memo is a projected 5-year technology budget. Hardware such as computers (student and teacher devices), networking equipment, copiers and projectors are included in the spreadsheet.

#### Mount Prospect School District 57 Technology Hardware Equipment - 5 Year Cycle

| Project                | Current FY | FY18      | FY19      | FY20      | FY21      | FY22      |
|------------------------|------------|-----------|-----------|-----------|-----------|-----------|
| LN Classroom Computers | \$150,000  | \$100,000 | \$50,000  | \$60,000  | \$150,000 | \$100,000 |
| LN Staff Computers     | \$5,000    | \$20,000  | \$15,000  | \$10,000  | \$15,000  | \$15,000  |
| LN Projectors          | \$12,000   | \$12,000  | \$12,000  | \$12,000  | \$12,500  | \$12,500  |

# DISTRICT 57 TECHNOLOGY PLAN

JANUARY 2017

## TECHNOLOGY STRATEGIC PLAN

## CONTINUE SUPPORT OF STEM INITIATIVES

- CODING
- Maker Spaces
- 3D PRINTING

### TECHNOLOGY STEERING COMMITTEE

- PLAN FOR MICROSOFT OFFICE UPGRADE
- MAINTAIN AND ENHANCE TECHNOLOGY CURRICULUM
- CONTINUE TO IMPLEMENT AND MONITOR 1:1 AT LINCOLN
- INVESTIGATE OPTIONS FOR STAFF LAPTOPS

## Increase Instructional Technology Coach FTE

.5 FTE AT EACH ELEMENTARY SCHOOL

# TECHNOLOGY STRATEGIC PLAN Computer Replacement

- SWITCH STAFF FROM EVERY 4 YEARS TO EVERY 5 YEARS
- STUDENTS: EVERY 4 YEARS
- CONTINUE TRANSITION OF STUDENT DEVICES FROM APPLE MACBOOKS TO CHROMEBOOKS

## TECHNOLOGY STRATEGIC PLAN

## PLAN FOR PRINTER/COPIER UPGRADES

- CURRENTLY IN YEAR 4 OF 5 YEAR CONTRACT/LEASE
- SIGNIFICANTLY REDUCE THE NUMBER OF PRINTERS WHILE INCREASING NUMBER OF COPIERS
- REDUCE COSTS AND CARBON FOOTPRINT

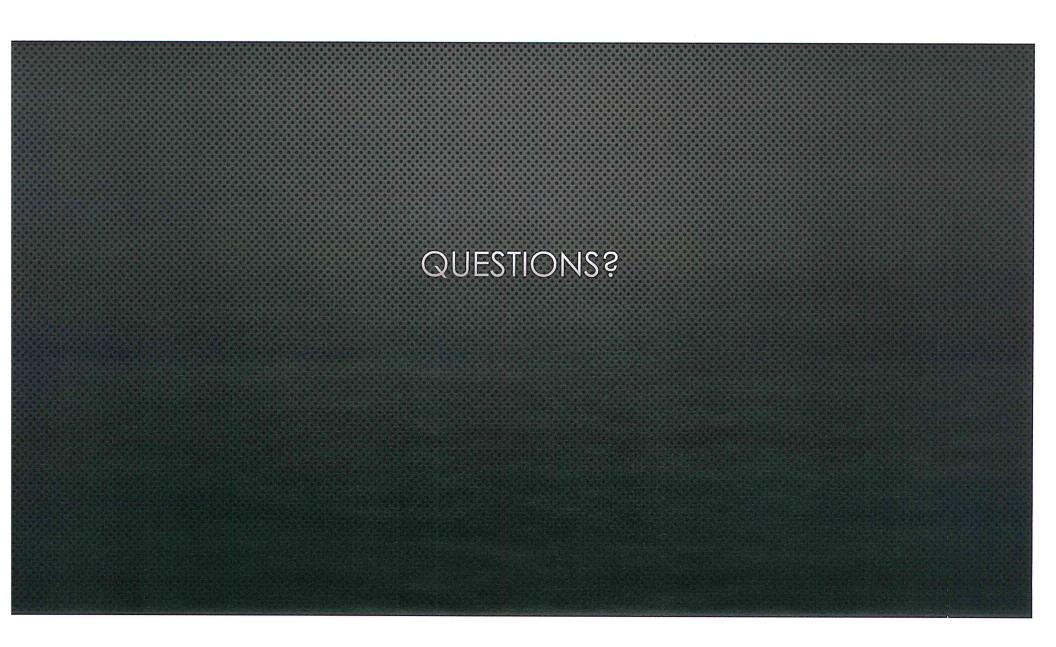

## THE NEXT STEPS

INTERNET AND WAN UPGRADES, SUMMER 2017

- APPLIED FOR E-RATE FUNDS
- REVIEWED PROPOSALS
- BOARD APPROVAL

LINCOLN INTERCOM REPLACEMENT

- SELECTED SOLUTION/PROPOSAL
- INSTALLATION PLANNED FOR SUMMER 2017

Re: Classroom Space Recommendation

A spike in enrollment is causing the district to have to find available classroom space in our elementary schools. The KDG enrollment for the 2016 - 2017 school year (232) is more than 30 students higher than the enrollment projection model target of approximately 200. When the within-grade growth multiplier (a calculation based on a five-year historical average enrollment) is factored, enrollment for first grade in 2017 - 2018 is projected to be 274 students. None of the enrollment indicators we monitor suggest the enrollment will not increase as the projections predict. Typically, nine sections of first grade is required; however, a projected enrollment of 274 will require an additional two sections for a total of eleven. With typical KDG enrollment projected for 2017 - 2018 (9 sections), Westbrook will require 2 additional classroom spaces.

Classroom space in District 57 is at or near capacity in each of the schools. For the 2016 - 2017 school year, the only school with available classroom space is Lions Park. There are four classrooms that can be recaptured. It is important to note that four classrooms do not lay empty. They are all being utilized. However, if these four rooms are necessary for classroom sections, they can be recaptured.

Before looking at relocating any sections or programs from one school site to another, we have to project classroom need at each site for 2017 - 2018 and beyond if possible. Annually, fall enrollment projections are used to determine the number of sections per grade level at each of our elementary schools. The Board of Education then approves the staffing plan brought forward by Administration in February each year. Due to the financial challenges we face in the district, we staff conservatively which results in class sizes in the mid-20's.

Based on the Fall 2016 enrollment projections, the following grade-level sections will be needed for 2017 - 2018:

|    | KDG | Gr1 | Gr2 | Gr3 | Gr4 | Gr5 | 2017-18<br>sections | 2016 - 17<br>sections |
|----|-----|-----|-----|-----|-----|-----|---------------------|-----------------------|
| WB | 9   | 11  |     |     |     |     | 20                  | 18                    |
| FV |     |     | 6   | 6   | 6   | 5   | 23                  | 22                    |
| LP |     |     | 5   | 4   | 5   | 5   | 19                  | 17                    |

These projections result in an increase of 2 sections at WB, an increase of 1 section at FV, and an increase of 2 sections at LP. Since WB is already at capacity (even now requiring art to be delivered without a dedicated classroom – "art on a cart"), two classrooms are needed. Fairview is also at capacity thus one additional classroom space is needed for 2017 – 2018. Lions Park as

referenced earlier has four available spaces but will need two of those classrooms for its own enrollment increase.

Fairview, also at capacity, will need to free up a classroom beginning in 2017 - 2018. Administration has investigated whether or not a program currently housed at FV can be relocated to Lions Park. The relocation of the SOAR program can be moved with minimal disturbance to the program. Fortunately, the integration of SOAR students with general education students can be readily replicated at Lions Park. The Lions Park students and staff are excited at the prospects of having SOAR join them next year and for the foreseeable future. The relocation of SOAR will impact three students, 1 certified staff and 2 ESP. Moving SOAR results in the loss of one of the classroom spaces remaining at Lions Park. Lions Park will then have only one classroom space remaining to recapture.

It is important to take a look at enrollment beyond 2017 - 2018. Although projections are recalculated every fall based on actual enrollment, we can project with a strong level of certainty that the following sections will be needed.

| _  | KDG | Gr1       | Gr2 | Gr3 | Gr4    | Gr5 | 2018-19<br>sections | 2017-18<br>sections |
|----|-----|-----------|-----|-----|--------|-----|---------------------|---------------------|
| WB | 9** | 9 or 10** |     |     |        |     | 19**                | 20                  |
| FV |     |           | 7   | 6   | 6      | 6   | 25                  | 23                  |
| LP |     |           | 5   | 5   | 4 or 5 | 5   | 19 or 20            | 19                  |

\*\*KDG remains an unknown and until a new enrollment trend is established, projections will continue to use a target of 200.

Based on these section projections it is highly likely that additional classroom space will be needed at FV in 2018 - 2019.

#### **Options Evaluated**

Administration has investigated the following options for housing the enrollment spike.

#### Option 1

Before enrollment projections were thoroughly reviewed, it was assumed two classroom spaces would be available at Lions Park for 2017 - 2018. Administration was asked to consider moving Early Childhood (EC) from WB to LP. Upon investigation, it was discovered that EC maintains five sections requiring 3 classrooms. Consequently, moving EC was no longer a possibility.

#### Option 2

Another option that was suggested for consideration was to move two sections of first grade from WB to LP. As the enrollment projections have shown, the available space is now down to one classroom. Administration does not support having one section of students moved to be in isolation from the rest of the grade level. Not only would one group of students be in isolation from their peers but one teacher would be isolated from her colleagues. There are numerous instructional and professional development benefits as well as efficiencies by having a grade-level housed at one school site. Furthermore, as stated earlier based on projections this would be a one-year fix.

#### Option 3

Another option that was suggested as a result of the Board of Education Community Forum was to investigate renting available space from neighboring school districts. Administration did contact our neighboring districts and there is no rental space available.

#### Option 4

A final option was to lease 2 mobile classrooms and install them at Westbrook. The Administration is considering both short-term and longer term options in making decisions about these mobiles. After significant discussion and staff input, Administration has determined to house music classes and the staff workroom/lunchroom in the mobiles next year. This will greatly limit the amount of time that any group of students will need to be in the mobile classrooms. Following are facts for the Board of Education to consider in making their determination of whether or not to approve the mobile purchase:

- The mobiles will be housed on the north end of the building. (See Exhibit A) New state code requirements prohibit mobiles of this size to be placed in the courtyard as previously discussed. Even though the initial plan is for the classrooms to house music class and a workroom, it is possible that regular education classrooms will be housed here even as early as the fall of 2017. Taking that into consideration, bathrooms will be included. (See Exhibit B)
- For safety and security, a covered canopy will be installed leading from the existing building to the mobiles. (See Exhibit C) The canopy will be installed on the north end of the mobiles. In this case, if a second set of mobile classrooms need to be installed at a later date, the existing canopy can be easily extended to that second set of classrooms.
- If enrollment continues to increase, an addition can be built on the property while the existing mobile classrooms are still being utilized. (See Exhibit A)
- The total cost of the mobile classroom project is estimated at \$200,000. This includes a two year lease of the mobile classrooms, the setup and installation, the construction of concrete piers, soil testing, fire alarm wiring, ramps, furniture, the canopy, technology, networking, electrical and plumbing costs. In addition to these costs, architect fees, contingency costs and village building permits are included as part of the \$200,000.

#### Recommendation

Actual enrollment and projected enrollment drive the Administration's recommendation to the Board of Education. Two mobile classrooms need to be erected at WB during Summer 2017 in order to be ready for occupancy at the start of the 2017 - 2018 school year. Mobile classrooms are available on a first come, first serve basis. Because of this, the Administration recommends taking action on leasing the mobiles at the February 2, 2017, Board Meeting.

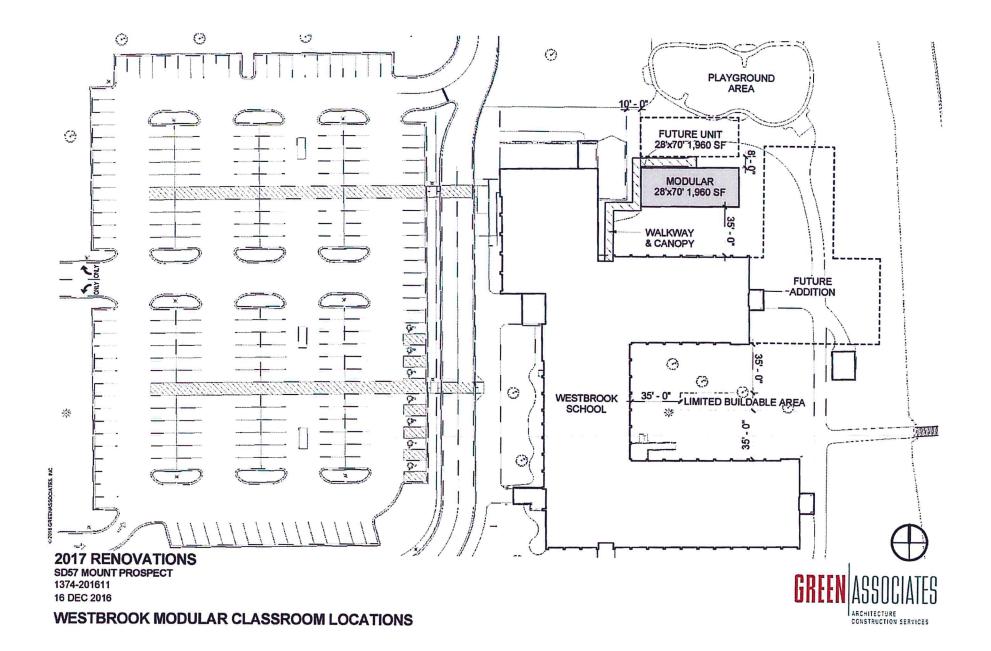

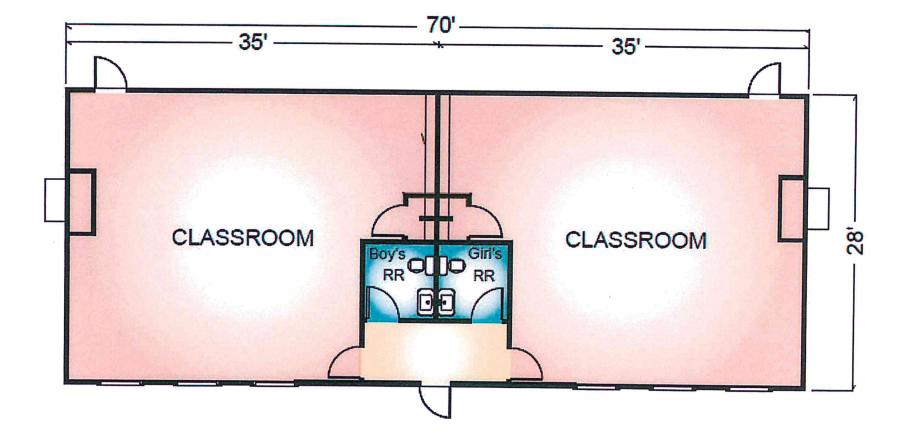

Exhibit B

### Report on Mount Prospect School District 57 Financial and Facilities Outlook

January 19, 2017

#### Introduction

District 57 has had a rich history of excellence, providing students with a strong education and preparing them to succeed at Prospect High School. However, the financial landscape of the State is challenging and ultimately the General Assembly will need to pass legislation to address the many issues faced by the State. Currently, there is little movement toward a resolution but, many areas are on the table to be addressed. In the next year we may see a number of changes that will adversely affect our District primarily at the State level but also at the Federal level. Below are some of the areas that could change.

- All indications from the State Legislature are that we will receive less financial support through a new school funding bill.
- There is much conversation that the State will shift some of its pension obligations to the local districts, and we will be mandated to pay for them. This shift will likely occur on a phased in schedule.
- Pending legislation from the Governor's "Turnabout Agenda" threatens to reduce our capacity to generate local revenue to fund budgets specifically through a property tax freeze.
- Standard operating costs will continue to rise.
- There will continue to be increased costs and requirements associated with the implementation of Affordable Care Act (ACA); e.g. the Cadillac Tax. Adjustments to ACA may become clearer now that we are past the presidential election.

This landscape creates a sense of urgency for us to respond to these risks as well as consider our own financial position as we seek to remain solvent for the future. Given this context we have provided this comprehensive study for the Board of Education. The study offers a clear vision of the programs and initiatives we need to offer to meet our changing educational and facility needs. Further, it identifies the resources to achieve them and, most importantly, sustain them.

This paper will provide a clear context within which we must operate as a District. The purpose of this comprehensive study is to provide the Board of Education with key information to guide our future decision-making and a strategy to move forward.

This study includes several parts so as to give the Board of Education a comprehensive view of what steps the District has taken to be fiscally responsible as well as to present the current realities that the District must address with respect to enrollment, facilities, and finances. Key areas addressed in the paper include the following:

- 1. Financial Landscape
- 2. Enrollment History and Projections
- 3. Facility Improvements
- 4. Staff and Program Reductions Over the Past Eight Years
- 5. Future Initiatives for District 57
- 6. Referendum Considerations
- 7. Planning for the Future: Three Options to Consider

#### 8. Summary and Next Steps

#### **Section I: Financial Landscape**

#### State Financial Landscape

Over the past decade the economic landscape of our State has deteriorated. The lack of resolve by our State leaders in Springfield to make long-term productive decisions has created great uncertainty for supporting school districts. Many of the conversations have centered on creating a more equitable funding model for schools (General State Aid GSA), shifting State pension obligations to local school districts, restructuring the Pension Systems, generating revenue sources, and implementing aspects of the Governor's "Turnabout Agenda" as previously mentioned. One of the key pieces of the Governor's agenda is a property tax freeze. Originally, it was proposed to be only two years, but this conversation has evolved into the possibility of a tax freeze being permanent.

We are all familiar with these conversations and one thing seems to be inevitable. It is highly likely that districts in our area of the state will not see any new revenue from State sources; rather, it is probable we will lose revenue. In addition, it is looking more probable that the State will shift the cost of its pension obligations to the local districts with no recovery provisions afforded. In other words, we will not be able to levy for these additional costs. How much damage this action creates may be a function of its implementation timeline. As a result, these factors will most certainly diminish our District's capacity to maintain the quality of programs and services we have grown to expect in our schools requiring the Board to explore other revenue options.

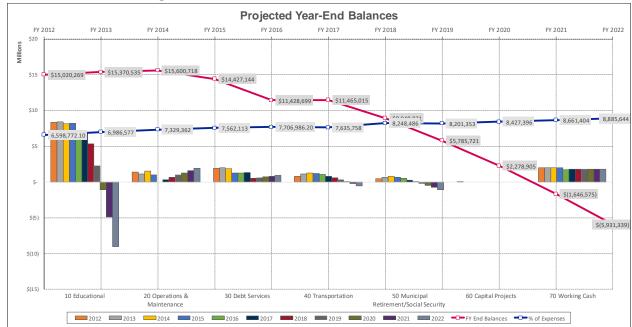

Of most concern to us is that there seems to be little action to resolve the State's financial crisis. The General Assembly continues to talk about the school funding concerns but cannot seem to come to consensus on a bill that it could approve and the Governor would sign. This summer the Governor created a bi-partisan committee to study the evidence-based funding model. This Committee is being led by Secretary of Education, Elizabeth Purvis. Our hope is that eventually the leaders will work out some compromise to end this impasse.

#### Local Financial Landscape

Locally, we really have two significant dynamics that are deteriorating our position. First, and most significant, is that we have been operating with a deficit spending budget for the past two years. Equally important to note is that we have been deficit spending in the Education Fund for more than a decade. The District needed to take this approach to meet our basic needs and growing enrollment. As we have discussed in our financial review sessions, we will dip below the Board's reserve target of 40% by the end of the 2017 – 18 school year if we do not find additional revenue to fund our budget. Below we have provided an overview of our Fund Balances, Revenues, and Operating Expenditures.

#### Fund Balances

Over the past decade, the District fund balances have gone from 77% according to the FY06 audit to 44% following the FY16 audit. The Board of Education adopted language in Policy 4:20 that states *the district will maintain fund balances in the range of 30 - 50\% with a target of 40% by the end of the fiscal year*, ending June 30<sup>th</sup>. To this point in time, we have been operating according to policy. The most recent financial projections indicate that the District will fall below the 30 - 50% range at the end of FY19. The reason for the steady decline in the fund balances is due to the ongoing implementation of a structured deficit budget, as mentioned. Despite the cost containment measures that have been implemented as delineated below, ongoing operating expenses continue to increase. Figure 1 below shows the District's fund balance projections.

#### **Figure 1: FUND BALANCE PROJECTION**

#### Revenues

As we know, a majority of the District's revenue (76.3%) comes for local property taxes. As a means of generating revenue, the Board of Education also assesses service fees. Every district addresses fees in its own way. Some districts do not charge fees, while others have numerous fees and they are high. In comparison to our neighboring districts, we tend to be on the high end of the continuum. We collect approximately \$1.527 million in student fees annually which accounts for approximately 6.5% of our annual budget revenue. Hence, property tax revenue and fees comprise 83% of our total budget.

Figure 2 shows our distribution of revenue by area.

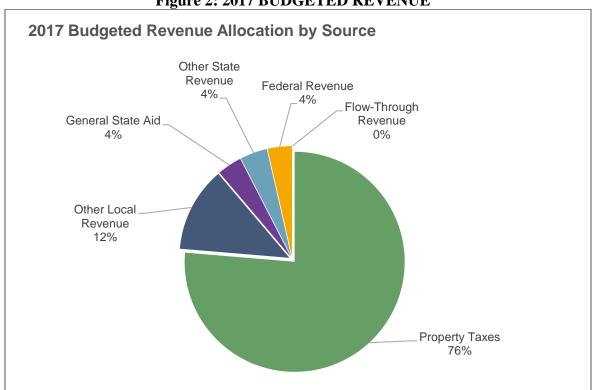

Figure 2: 2017 BUDGETED REVENUE

There are a number of factors that affect our revenue stream. These factors have been present for some time and we do not see them improving in the near future. These factors include:

- Residents and businesses continue to file tax objections reducing our revenue,
- Interest rates remain very low. As a result, we do not earn much on our investments, and
- Delayed and diminished revenue sources from the State adversely impact our budget. (Mandated Categoricals i.e., special education) Often times the amounts appropriated are reduced and in recent years have been delayed, causing us to use our own funds to compensate until we receive them.

#### **Operating Expenditures**

Operating expenses increase each year, with salaries, medical costs, supplies, outsourced services, and the like. The amount that we are permitted to levy under the Property Tax Extension Limitation Law (PTELL) limits our ability to levy more than the CPI and new growth and development. This limit does not bring in sufficient funds to cover the costs of our increases. For example, in our most recent levy cycle we were only able to levy the CPI for 2015 which was .7% plus approximately \$23 million including the TIF retirement for new growth and development. This levy will fund a large portion the 2017 - 18 budget.

Our largest expense is personnel and we have very reasonable Agreements with our certified and educational support staff Associations. Our staff are compensated fairly but still remain among the lowest in our North Cook Region. In other words, we are not over paying our staff for the great work they do. Figure 3 shows our breakdown by fund and the costs assigned to personnel.

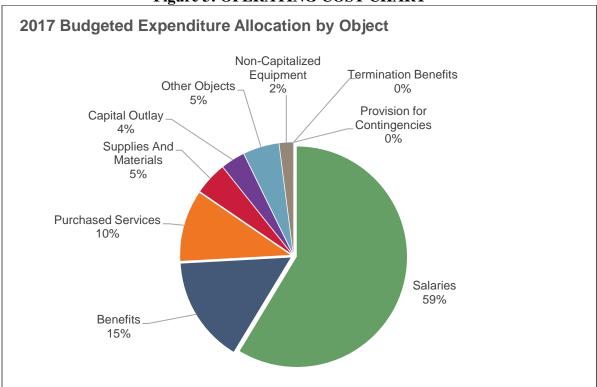

Figure 3: OPERATING COST CHART

Looking deeper into salaries, the following table (Figure 4) compares teacher average salary with class size and administrator average salary with per pupil ratios. The districts used for comparison are our neighboring districts that are typically identified for these purposes. In examining the data, District 57 teachers are definitely the lowest paid compared to our neighbors and even below the State average while at the same time have the highest class size. District 57 administrator salaries fair better in the comparison; however, it results from a significantly higher administrator to pupil ratio, meaning District 57 does not have an abundance of lower tiered administrators which greatly affects the average salary calculation.

| rigure 4. Average balary and class bize comparison |                    |                |                  |                   |  |  |  |  |  |
|--|--------------------|----------------|------------------|-------------------|--|--|--|--|--|
|  | Avg Teacher Salary | Avg Class Size | Avg Admin Salary | Admin:Pupil Ratio |  |  |  |  |  |
| Arlington Hts. D25                                 | \$72,962           | 20             | \$103,706        | 160:1             |  |  |  |  |  |
| Prospect Hts. D23                                  | \$65,041           | 17             | \$115,103        | 158:1             |  |  |  |  |  |
| River Trails D26                                   | \$74,029           | 19             | \$126,782        | 147:1             |  |  |  |  |  |
| Mount Prospect D57                                 | \$57,996           | 26             | \$123,018        | 229:1             |  |  |  |  |  |
| Des Plaines D62                                    | \$71,021           | 24             | \$118,556        | 162:1             |  |  |  |  |  |
| Comm. Cons. D59                                    | \$79,898           | 20             | \$121,370        | 147:1             |  |  |  |  |  |
| State  | \$63,450           | 21             | \$103,634        | 177:1             |  |  |  |  |  |

Figure 4: Average Salary and Class Size Comparison\*\*

\*\*Data reported on the 2015 IL School Report Card

As mentioned above, the District has engaged in significant cost containment in which we have made significant personnel reductions and raised the class size to its limit. We will continue to seek other operating efficiencies, but the financial forecast indicates that these measures will only marginally help us. Eventually, we will need to consider a referendum.

#### Village of Mount Prospect TIF

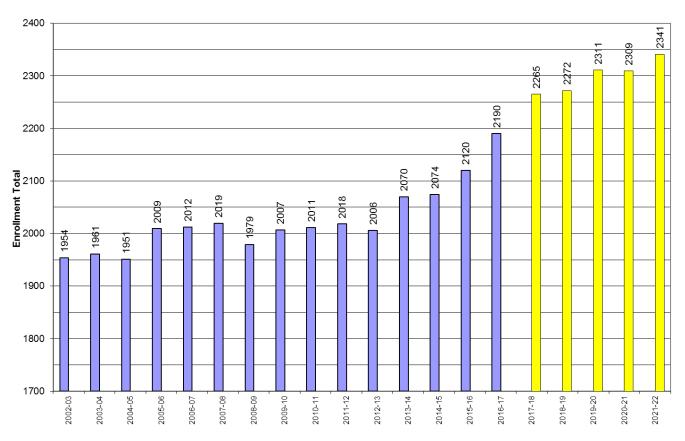

Another matter concerning District 57 is the Village of Mount Prospect's move toward creating a new Tax Increment Finance (TIF) district. District 57 is looking for ways to use funds from the TIF to benefit the schools. The Village has expanded the TIF boundaries to include Lions Park School, which means TIF dollars could be used for improvements there. The new TIF encompasses the Northwest Highway corridor from Mount Prospect Road west to Central Road. This would freeze the revenue that the District would receive from properties inside the TIF for the next 23 years.

Both the State and local financial landscapes pose challenges for the District. As we plan for the future, we need to respond in such a way as to preserve those essential and highly valued programs and services that we currently offer. At the same time, we want to provide the innovations emerging in our profession that will create learning experiences for the next generation of students. However, the challenges to fund and operate them are great.

#### Section II: Enrollment History and Projections

Each year, we update our enrollment projections using the most current data and trends. In this way we can make the most accurate projections over a five-year period.

The district's enrollment has been stable with a modest increase over the past decade. Enrollment in 2007 - 08 was 2,019. It gradually, but steadily, rose to 2,190 in 2016 - 17. The five-year projection analysis shows a steady increase to 2,341 in 2021 - 22. The increase in enrollment will require us to hire additional teachers. Figure 5 below provides our enrollment projections through the 2021 - 22 school year. In this projection model we anticipate increasing enrollment by 151 students from our current enrollment. This increase could require us to hire as many as 6.0 FTE (regular teacher and specials).

#### Figure 5: FIVE-YEAR ENROLLMENT PROJECTIONS

#### Section III: Facility Improvements

The most significant expense incurred due to facilities over the past decade has been the re-opening and subsequent reconfiguration of Westbrook School to be a PreK – Grade 1 center. This was accomplished in three phases (re-opening the school in 2006 as a PreK/K, reconfiguring the school to a PreK/1 in 2010, and parking lot improvements 2015). Re-opening Westbrook was an absolute necessity as enrollment at Lions Park and Fairview exceeded capacity. The most cost effective way to address the overcrowding was to create a grade level center to house PreK – Grade 1.

Total cost of the three phases of renovations (re-opening to Pre-K/K, addition of Grade 1, and parking lot expansion) has been approximately \$8 million. While the District incurred the cost of renovations initially out of the fund balances, the Board of Education recaptured the money through the use of the debt service extension base (DSEB) thus having limited overall impact on the fund balances. At this time, the District has exhausted its DSEB.

As a matter of course, the District budgets \$750,000 annually for summer facilities projects and maintenance. The District Master Facility Plan (MFP) outlines the priority of facility improvements and guides the determination of which projects to address and when. Over the next five years, major facilities projects should include installation of sprinkling systems and

parking lot work at Fairview and Lions Park. In addition, the Ten Year Safety Survey was conducted in October 2016 where priority A/B items were identified. These items will be addressed in the next five years.

In regards to facilities it is important to note that Administration is making the recommendation to construct two mobile classrooms at Westbrook for the 2017 - 18 school year as a means to address the kindergarten enrollment spike in 2016 - 17. We will be monitoring the kindergarten enrollment closely when registration begins in January 2017 in order to determine if the spike experienced this year was an anomaly or the beginning of a significant enrollment trend.

#### Section IV: Staff and Program Reductions Over the Past Eight Years

#### <u>Staffing – Reduction of Certified and Educational Support Staff</u>

#### Certified Staff Reduction

In the spring of 2011, the District implemented a reduction in force (RIF) of 24 FTE certified staff positions. These reductions included:

- 20 elementary classroom teachers (K 5)
- One music teacher
- One art teacher, and
- Two LRC directors

It is significant to point out that these reductions resulted in larger class sizes. Originally our guidelines for K - 2 were 20 - 23 and Grade 3 - 5 were 22 - 25. Following the RIF, all elementary grade levels had class sizes ranging from 23 - 30. (As mentioned, when our enrollment increases we open additional sections and hire teachers but at this heightened class size.)

There is a continued emphasis to try to keep the K - 2 classrooms limited to 25 students, but in cases where it has exceeded 25, instructional aides have been added to provide teachers with assistance. However, when an instructional assistant is added, the person is assigned to assist in two classroom sections not just one.

Despite this reduction in force of certified staff and our increase in class sizes, the enrollment growth has resulted in an increase in the number of K – 5 sections. The sections have grown from 49 in 2011 - 12 to 58 total sections in 2016 - 17. With each full-time certified staff member we add costs us approximately \$58,000 in salary and benefits, and these expenditures must be sustained over time.

The class sizes in grades 6-8 are typical for middle school and vary widely in range. However, we consistently exceed 25 students per class and sometimes eclipse 30 students in some classes. The MPEA Collective Bargaining Agreement (CBA) provides a stipend for large class sizes. Five-year enrollment projections, as previous presented, forecast Lincoln will be at highly elevated enrollments. The building was designed to house approximately 700 students. Enrollment is currently 723 with projections to exceed 800.

#### ESP Staff Reduction

The reduction of Educational Support Personnel (ESP) primarily focused on four groups:

- 1. Nine Kid's Corner personnel
- 2. One administrative clerical position
- 3. Two custodial positions, and
- 4. One sub caller

It bears noting that with instructional assistant positions we try to only staff assistants to provide support for special education students as specified in IEP's. However, we have temporarily added instructional assistants in the cases of large K - 3 class sizes as explained above. In addition, we annually use Title I grant dollars to provide assistants for English Learners (EL) and literacy support.

#### Programs Reductions

It has been very important to the District to maintain its high level of programming for student success. We maintain a five-year curriculum cycle and update it annually for the Board of Education. During the past decade, new or updated curricula have been implemented in all of the core and specials areas as required by the Illinois State Board of Education (ISBE) with the Common Core State Standards (CCSS) and the *Next Generation Science Standards* (NGSS). Moreover, we have implemented new curricula to address emerging technology and engineering (e.g., Gateway to Technology GTT) along with social studies. The average cost for implementing new or updated curricula ranges from \$200,000 to \$220,000 per subject area discipline. In addition to the cost of materials, there are costs of providing the professional development to staff which would include substitute teacher pay for days teachers are pulled from their classrooms to participate in professional development.

While we have held our commitment to the core learning subjects for every child, some programs and services were affected. You will recall that starting with the 2011-12 school year, we undertook many cost saving measures which included the following:

- Eliminating 4<sup>th</sup> grade band and orchestra
- Re-sectioning teams at Lincoln
- Restructuring gifted education
- Reducing Kindergarten art, music, and physical education sections per week
- Restructuring LRC programming at the elementary schools
- Eliminating numerous curriculum field trips
- Eliminating Summer Quest
- Eliminating transportation options for Preschool
- Eliminating outdoor education at Lincoln, and
- Eliminating the Lincoln activity bus

In the future, we would like to reinstate some of these programs should our financial position permit it.

#### Section V: Future Initiatives for District 57

#### Current Programming Priorities

#### Core Curriculum

It will be important to maintain all of our current core areas of instruction. The core areas include reading, English language arts (ELA), mathematics, science, social studies, and physical education/health. In Grades 1 - 5, instructional minutes for reading, ELA, and mathematics are comparable with neighboring districts and exceed the State average. This statement is also true for ELA in the middle school. However, District 57 middle school mathematics instructional minutes are below the State average. To address this deficiency, the middle school schedule is going to be adjusted to allow for increase in mathematics minutes beginning in 2017 – 2018. This scheduling adjustment will cost the District an additional 4.0 FTE certified staff (approximately \$232,000 annually).

#### Supportive Services

In addition to our core curriculum, the District offers supportive services that are vital to our students' success. These services are special education, English language (EL) support, and literacy and mathematics support. These services are highly valued and, in the case of special education and EL, mandated by law.

#### Non-core Curriculum

Non-core curriculum or "specials" include art, music, foreign language, computer integration, and GTT. Although these curricula are not mandated in Illinois School Code, they are highly valued in District 57 and currently rank among our top priorities. Moreover, they provide a rich, well-rounded curriculum that meets the needs of the "whole child."

#### **Future Programming and Staffing Priorities**

There are a number of areas where we are seeing a greater need to provide programs and services which would require additional personnel and resources. These positions would be considered highly valued in our staffing structure. Many districts around the nation and in our region are moving in these directions primarily because the needs of schooling in our society are changing. Thus, these programs and services are becoming more vital to better meet the educational and social needs of the children we serve.

We have provided a brief description of the need and the direction we would take should the District be in a financial position to implement and sustain them; and should the Board want to consider them.

#### Full-day Kindergarten

The topic of full-day kindergarten (FDK) is one of varying opinions throughout the country and the research findings are mixed. The research on the educational benefits from full-day kindergarten is mixed. Currently, the research shows two conclusions.

- 1. First, there is clearly benefit from full-day kindergarten programs for "at-risk" children. This is attributed to the fact that these children do not have the benefit of sound educational preparation at home or early learning experiences through preschool. Fortunately, this is not an issue in District 57, as our children come to school well-prepared to learn.
- 2. Second, research that initially shows benefit for children in full-day programs is negated by the time the children reach Grade 3. I would hasten to say, though, that the issues examined in these research studies are almost exclusively with populations of students unlike ours; so the findings may or may not apply.

We are finding that more districts are moving to this structure for kindergarten, nationally. Even in our region there is an increase in the number of districts offering full-day kindergarten. The movement toward a full-day program is naturally putting pressure on those districts, like District 57, that are electing to maintain half-day programs.

Despite the research findings on full-day kindergarten, districts like ours have a very real, but different question that we must face. District 57 needs to ask the question "Do we have sufficient time to cover all the curricular expectations (including the Common Core State Standards, Next Generation Science Standards, etc.) and provide sufficient social/emotional experiences and play for the students in a half-day program?" Many school districts have determined that is not possible and have moved to a full-day program. I would concur that in a perfect world I would prefer to see the District offer a full-day program as I believe it would offer more opportunity for our students to have the time to experience all these programs. The challenge for District 57 to implement full-day kindergarten, however, is that we do not currently have the classroom space to offer an FDK, and there would be a cost to staff this program.

If the Board of Education decided in the future to offer a full-day kindergarten program, the additional costs would have to be factored into the budget. We would need to hire five additional FTE classroom teachers and some special area teachers to provide art, music, and PE (partial FTEs only). These staff would cost approximately \$400,000 annually. In addition, we would need to build five new classrooms on to Westbrook along with possibly another art and/or music room. Finally, we would have to build a new gym as the current gym would need to be a multi-purpose room to accommodate double the lunch period. These construction costs would be approximately \$6 million.

#### Physical Education Five Days Per Week

The State requires physical education (PE) to be taught five days a week. Currently in Grades 1-5, we offer PE with licensed PE teachers three times per week and KDG twice per week. We offer structured physical activity the remaining two days per week by the classroom

teacher. This structure does fulfill the State mandate. However, a number of districts around the nation and in our region offer five days per week of physical education with a licensed teacher.

It would be a positive step if we could offer PE daily five times each week given the need for regular physical activity and instruction. It is consistent with a healthy lifestyle and supported by research. It would also be more consistent with the State mandate. However, to implement this change would require both an increase in staff of 3.0 FTE licensed staff (approximately \$174,000 annually) and additional gym space in each of the three elementary schools, Fairview, Lions Park, and Westbrook (approximately \$1.8 million per gym).

#### **Staffing Initiatives**

#### Early Childhood Coordinator

Reporting requirements and management of early childhood programming have risen to the point that it warrants its own administrative oversight. Up to this point the duties were carried out by a WB teacher who received a stipend. However, the magnitude of responsibilities has exceeded the expectations of a typical teacher stipend. Administration is recommending that these duties be part of the job description of an assistant principal for WB school. This position was included in the base assumptions for the Fall 2016 financial projections.

#### English Learner Coordinator

The English Language Learner (ELL) population is growing all over our region. We have seen an increase over the past five years in EL students. In 2012 - 13 our ELL population in the District was 33. Today we serve 153 students.

Moreover, just as is the situation regarding early childhood programming, reporting requirements and management of the EL program have grown to a similar point requiring specific administrative licensure. Administration is recommending that these duties be part of the job description of an assistant principal at either Lions Park for Fairview.

#### Literacy Coordinator

Supplementary literacy support service is another area that could benefit from an individual who could specialize in program oversight. These duties would be fulfilled by another elementary school assistant principal.

#### Assistant Principals for Elementary Schools

Enrollment increases and additional teacher evaluation requirements under PERA have created a need for additional administrative support in our elementary schools. A single administrator in each of our elementary schools simply cannot meet the demands of teacher evaluation and student supervision. In the North Cook Region alone, 53% of the districts employ elementary school Assistant Principals for the reasons cited. Salary for an elementary assistant principal would be approximately \$77,000.

#### Facilities Initiatives

As we look to the future there are a number of facilities improvements that we will need to make to simply maintain our buildings and to be in compliance with School Code. These improvements would be identified from three sources:

- 1. *Results and Recommendations of the Ten-Year Safety Plan* These would be items that are identified as Required and Recommended.
- 2. Long-term Capital Improvements There would also be ongoing maintenance and improvement that would come from our Master Facility Plan. These items would be important as they identified through their system and typical lifespan. We would plan improvements and schedule their work accordingly. The funds for these improvements typically come out of the capital improvement budget we build in the annual budget.
- 3. *Preventive Maintenance Program* The lifespan of our current HVAC, roofs, boilers, and other systems are directly correlated to the preventive maintenance that we conduct on them. To the extent that we can have a strong preventive maintenance program, we will be able to maintain systems and facilities well. Obviously, the lifespan of many systems is a function of ongoing care and maintenance of them.

#### Proposals for Future Facility Initiatives

Proposals for future facility initiatives will be determined by two fundamental sources. First, we must address our current realities of growing enrollment and the age of Lincoln Middle School. Our enrollment projections have been incredibly helpful to see what our future needs will be. In addition, Lincoln Middle School is at the place where we must consider if it is prudent to build a new middle school – See options below. If the Board pursues some of the above suggestions, we would need to ensure we have the space to operate and sustain them over the next 15 - 20 years.

Below we have outlined three options for future direction that include both funding and facility improvements. However, with respect to facility improvements, the following ideas will be conceptualized in broad terms.

- 1. If the District were to pursue a full-day kindergarten, we would need to add classrooms and gym to Westbrook
- 2. To address our increasing enrollment for the short-term we do need to add mobile classrooms at Westbrook next year and possibly to Fairview the year after. However, in the long-term we will need to consider additional classroom space that would come in one of two likely forms:
  - a. add classrooms and gym to Fairview and Lions Park
  - b. build a new Lincoln Middle School that houses grades 5-8 with no additional work done to Fairview and Lions Park
- 3. With the aging of Lincoln, we will likely need to consider building a new Lincoln Middle School just for grades 6 8 or move to a grades 5 8 configuration as noted

above; OR we would need to consider a significant renovation of Lincoln, the cost of which would be likely comparable to new construction.

We will delineate these possibilities further in the Options below.

#### Section VI: Referenda Considerations

To this point, we have reviewed the current and potential financial landscape of the State and the District. We have also discussed possible staffing, programmatic, and facility options if we want to maintain current programs and services in light of our financial landscape. Finally, we have offered some possible future innovations and jobs that would place the District in a strong position to meet students' needs as the education arena evolves.

What is clear from these analyses is that it seems inevitable that the District will need to consider seeking a referendum if we want to maintain the current programs and services that are offered. If the Board wanted to explore any new innovations, these would have to be considered as part of the referendum.

We will no longer be able to have confidence that the limited revenue we receive from the State or federal government will continue at current levels. Also future property tax revenue may be curtailed with a property tax freeze, and we may actually have additional obligations to shoulder if the General Assembly shifts costs to local school districts. Therefore, it will be a priority for us to look for ways to enhance our current revenue sources through a property tax increase. In short, whatever District 57 offers in the future must be affordable and be balanced against maintaining our fiscal solvency. We want to present a clear vision of what our future holds over the next five years and make a recommendation to ensure the District's financial solvency for years to come.

In this section we will address a number of factors regarding consideration of a referendum. Specifically, we will explore the following:

- 1. Provide a brief history of the District's experience with referenda over the past two decades
- 2. Explore several factors that would need to be considered for the Board to determine the direction it would like to take pertaining to a referendum; and
- 3. Offer a strategy to address a referendum.

#### History of District 57 Referenda

The District has pursued two types of referenda over the past two decades. The first were capital improvement bonds to build both Fairview and Lions Park. In 1994 the community passed a building referendum (\$13.5M) from which Fairview and Lions Park were constructed. In 2004 the community was asked to approve another building referendum to make improvements at Lincoln and Westbrook (\$8.9M). It did not pass. No other building referenda have been explored since that time.

The second type of referendum is an Educational Fund rate increase. The purpose of this type of increase is to provide a higher level of local property tax support to fund our salaries, programs and services. The District attempted to pass an Educational Fund increase in 2000, 2001, 2003, and 2004. Each time the referendum failed. The 2003 referendum failed by a very narrow margin of 42 votes. (The last successful Educational Fund tax rate increases occurred in 1968 and 1988.) It is important to try to understand why the failed referenda did not pass so as to better understand how to set the narrative for a future attempt. There was no official post mortem documentation that we could find but we offer the following possible explanations:

- 1. It appears that the wider community did not have the confidence that the District had made every attempt to contain its costs.
- 2. At the same time, the community felt that the fund balance reserves were sufficient enough to meet the needs of the District.
- 3. We also believe that the District had not made a compelling argument for the need and the conditions in the State were not as dire. In essence, the community felt that the District could continue to operate at the existing fund rate levels with modest increases to the levy.

Conditions in the District and the State are very different now than in 2003. We have taken deliberate steps to be transparent with our community about our financial condition. We have documented and implemented many cost containment efforts and our parents, in particular, have felt the impact of these efforts. Finally, the looming factors from the State offer no hope that our financial situation will improve.

#### Determining the Need for and Scope of the Referendum

It is important at this point to be completely clear about what we do know about the financial future and what we would like to see the District implement over the next five years. In all candor, this is the point where there is not as much clarity.

Looking specifically at the impact of State legislative items, here is what we are waiting

- on:
- Will there be a pension cost shift obligation passed on to local school districts?
  - If so, the most important factor will be how quickly will it be phased in? A shorter the phase-in period will have a more dramatic adverse impact.
  - Another consideration is will there be any recovery provision for us to levy taxes to offset this obligation. All conversations surrounding this topic to date have not included a recovery provision.
- What will be the impact of a new school funding model?
  - Currently, the Governor has created a bi-partisan committee to study a school funding model and it has been charged with making a recommendation in the spring of 2017. With this timeline, we do not expect there to be any action by the General Assembly until the end of the spring session. If the past experience holds true, there will likely be no action in that session.
  - Another consideration of the funding model is whether there will be a "hold harmless" provision for districts that would have lost money with the new

formula. The impact of this provision would be to not hurt the school districts that would be frozen in their amount of state aid.

- *Will there be a property tax freeze and will it be "permanent"?* 
  - The Governor's "Turnabout Agenda" has always included some form of property tax freeze. Originally, it was proposed for two years. In recent months there has been conversation about making it permanent. A two-year freeze would be adverse but most districts could likely weather that especially if CPI remains low. A permanent freeze would be devastating to all districts in that there would be no ability to increase revenues other than re-development or new growth.
  - While a freeze would not adversely impact for the short run, we could not sustain our financial stability with a permanent freeze.
- Will there be any restructure to the Pension provisions?
  - There has been conversation in Springfield about adjusting the pension provisions. Most have been met with opposition because a change would be unconstitutional. However, some thoughts of shifting pension burdens for salaries over \$180,000 annually to the local school districts have been discussed.
  - Currently, this topic has not been developed beyond an initial proposal and there is no indication that this will move forward at this time.
- What is the future of the Patient Protection and Affordable Care Act (PPACA)?
  - The future of the Affordable Care Act is in limbo at this point in time. The change in the White House is likely to have a profound impact on the law but enactment of any change will take time. The impact of any changes will continue to have our utmost attention.
  - Also, the Cadillac provision has been delayed until 2020. This could affect our school district depending on the medical plans we offer. Also, it is possible that it may be a provision that is never implemented.
  - Despite knowing the outcomes of the November General Election, it will most likely take some time for any changes to be implemented.
- What has been the impact of shifting state funds from the Mandated Categoricals to the General State Aid?
  - This funding is directly impacted by activity in the General Assembly. Only time will tell of the impact but it could result in hundreds of thousands of dollars.

One additional factor must be considered. We have been actively involved in collective bargaining. By the time all the above factors are settled, we will have completed our negotiations. We will need to keep these factors in mind as we negotiate and, hopefully, will have more information from the State to factor into the bargaining discussions.

The most important thing to consider at this point is we will need time to determine the adverse impact of these factors on the District. Our suggestion at this time is that we wait until decisions are made and then take the time (possibly 4-6 months) to study the long-term impact on our District. Once we know the impact, we will be able to clearly discuss how the District will be affected. We can then develop a five-year projection and know what funds we need to operate the District for the long-run.

Despite not knowing the future of the State direction and the impact that it will have on us, we have three options that must be considered. What the State ultimately does will simply accelerate the need to take action and will affect the scope of what needs to be done. The Options outlined in the next section remain directions that the District must explore and on which the Board will need to take action.

#### Section VII: Planning for the Future – Three Options to Consider

In this section, we present three options for moving forward. However, Option 1 is only a short-term solution to our financial solvency, and ultimately we need to move to either Option 2 or 3.

#### **OPTIONS**

#### *Option 1* Seek to Maintain the Current Level of Programs and Services with Current Funding Sources

Option 1 proposes that the District continue to operate using the same cost containment and program reduction approaches as we have done. It also assumes that there will be no further changes to our funding sources. By this we mean that we will levy the CPI plus any new redevelopment and improvements. If we take this pathway, we have approximately 3-5 years before the District cannot sustain its fund balances and ultimately its operation.

As a reminder, our current approach is to seek no expansion of programs and services and to simply maintain the current programs and services as they will exist starting 2017 - 2018. With respect to cost containment, we have taken much of the action we can already without dramatically affecting these programs and services. We could look for further cost savings as contracts with vendors come up, but this seems to be our only course moving forward. None of these steps, however, will place the District in a stronger financial position to sustain us into the future.

| OPTIC<br>Use Same Approach to Address Current  |  |

| <ul> <li>Budget/Fund Balances</li> <li>Will continue with deficit spending resulting in decreased fund balances</li> </ul>   | <ul> <li>Budget/Fund Balances</li> <li>2017 – 18<br/>34% Fund balances still satisfy Board<br/>Policy guidelines</li> <li>2018 – 19<br/>23% Fund balances fall below Board<br/>Policy guidelines</li> <li>2019 – 20<br/>10% Fund balances remain below Board<br/>Policy guidelines</li> <li>2020 – 2<br/>-2.35% Fund balances are exhausted</li> <li>2021 – 22<br/>-16% Fund balances are exhausted</li> </ul> |

### Option 2 Seek to Pass a Referendum to the Education Fund.

Option 2 proposes that the District seek an Education Fund referendum with the purpose of maintaining our current programs and services, and staffing pattern for a 15-20 year period. A successful referendum would not only maintain our current programs and staffing, it would keep District 57 comparable to neighboring districts in these areas as well as with staff compensation. Option 2, however, would not address the District's emerging facility issues neither as delineated in Option 1 nor would it permit the District to explore lowering class size ranges.

| OPTI  |   |
|---|---|
| Seek an Education   | Fund Referendum   |
| Key Components  | Projected Impact Over Next 5 Years  |
| <ul> <li>Enrollment <ul> <li>Projection indicates modest but steady increase</li> </ul> </li> <li>Class Size Range <ul> <li>K - 5 (22 - 28)</li> <li>6 - 8 (25 - 31)</li> </ul> </li> <li>Programs and Services <ul> <li>Current Programs and Services</li> <li>Implement additional math minutes at Lincoln</li> <li>Student Services/Administrative Support</li> <li>Learning Resource Center (LRC) staff to 1.0 FTE per building</li> <li>Kindergarten Fine Arts</li> <li>4<sup>th</sup> grade orchestra program</li> </ul> </li> </ul>  | <ul> <li>Enrollment <ul> <li>Projected increase of 151 to 2,341.</li> <li>Increases to affect all schools in varying degrees</li> </ul> </li> <li>Class Size Range <ul> <li>Remains the same for all schools</li> <li>If space becomes available, class size could be reduced</li> </ul> </li> <li>Programs and Services <ul> <li>Able to maintain all existing programs for 15-20 years.</li> <li>Reinstate LRC, Kindergarten Fine Arts programs, and 4<sup>th</sup> grade orchestra</li> </ul> </li> </ul>  |

|  | 50% with a target of 40%)                 |

## *Option 3 Seek to Pass Two Referenda, Education Fund and Building Fund*

Option 3 proposes that the District seek first an Education Fund referendum as outlined in Option 2 and a Building Fund referendum to address our facilities. Option 3 has four key components to it.

- 1. Lincoln is our oldest facility and the one in the most need of improvement. At some point over the next 10 years, Lincoln will need to either be razed or totally renovated. The cost to renovate would have to be weighed against the cost to rebuild.
- 2. The District grade level centers would have a slightly different configuration. In this Option, the configuration would be as follows:
  - a. Westbrook remains the same PreK-1 grade level center
  - b. Fairview and Lions Park would be reconfigured into grades 2-4 elementary centers, and
  - c. Lincoln would be reconfigured into a grades 5 8 middle school.
- 3. This Option also builds in the expansion of Kindergarten to a Full-Day Program with additional classrooms, small group instructional space, and a gym being added to Westbrook.
- 4. Finally, this Option addresses the need to reduce class size across all schools.

With respect to the referenda, Option 3 proposes that the District successfully pass an Education Fund increase in the next three years. Then in the following 5-7 years the District would need to pass a Building Fund referendum for facility improvements to Lincoln and Westbrook. The Board has had many conversations over the years about the eventual need to address the capital improvements needed at Lincoln. It is a building that is more than 60 years old and it is challenging to meet the needs of  $21^{st}$  century schooling. The estimated cost of a new Lincoln Middle School configured for Grades 5 - 8 is approximately \$62 million dollars.

The Administration also considered the possibility of keeping the configuration of the schools the same. However, this option would be costlier to the District as it would necessitate additional space to be added to all four schools, as this option addresses a reduction in class size.

If the District builds a new grades 5-8 Lincoln Middle School, we would configure this school to have a 5-6 wing and a 7-8 wing to better address the social-emotional and age appropriate needs of the students.

Option 3 as proposed would position the District well for the next two decades.

\*ESP staffing is most notably impacted by number of instructional assistants needed to meet special education IEP requirements and, therefore, difficult to project.

\*\*Cost does not reflect the inclusion of a district administration center

## **Summary and Next Steps**

The purpose of this comprehensive study is to provide the Board of Education with key information to guide our future decision-making and a strategy to move forward. This study includes several parts so as to give the Board of Education a comprehensive view of what steps the District has taken to be fiscally responsible as well as to present the current realities that the District must address with respect to enrollment, facilities, and finances. Key areas addressed in the paper include the following:

- 1. Financial Landscape
- 2. Enrollment History and Projections
- 3. Facility Improvements
- 4. Staff and Program Reductions Over the Past Eight Years

- 5. Future Initiatives for District 57
- 6. Referendum Considerations
- 7. Planning for the Future: Three Options for the Future

The findings of the study indicate that the District will need to address three key priorities of development:

- 1. The district will need to seek an Education Fund Tax Rate Increase in the next 18 months in order to preserve the district's fiscal solvency to meet the regular expenses and address the growing enrollment.
- 2. With the changes occurring in education and in schooling for the 21<sup>st</sup> century, other supportive services and programs are needed to meet the needs of our students.
- 3. The increasing enrollment coupled with the need to implement capital improvements will require us to create a plan to house students and keep our facilities in safe operating order.

#### Next Steps

#### Education Fund Tax Rate Increase – Referendum

The first priority moving forward is for the Board of Education to determine when to seek an Education Fund Tax Rate Increase. Administration recommends going to referendum for an Education Fund increase at the March 20, 2018 election (Gubernatorial Primary Election). If the referendum fails, reduction in force and in services would have to be implemented for the 2018 - 2019 school year. A second referendum attempt would occur at the November 6, 2018 election (Gubernatorial General Election). Successfully passing an Education Fund Referendum will ensure fiscal solvency for the District for the next 15 - 20 years. This is paramount.

Steps to begin undertaking toward this process include the following:

- Create a clear question,
- Determine the specific amount of money needed and what it will be used for,
- Publish the list of staff and program cuts that will be eliminated if the referendum does not pass,
- Find active empty nesters to be strong advocates of the referendum; engage people in senior living facilities, community centers, park districts, and explain their duties as citizens and community members,
- Partner with PTO's/PTA, Park District, Village, Chamber of Commerce,
- Be consistent with the need, the story, the message,
- Consult with the district attorney to have a clear understanding of the roles the administration and BOE members can play in the process; and
- Identify the opposition and any skeletons in the closet.

#### Programming/Services and Staffing Needs

Second, we have current needs for programming and staffing that will need to be built into the staffing plan for the 2017 - 2018 school year and beyond. These positions were presented to the Board of Education at the November  $17^{th}$  meeting during the annual fall financial projections. To summarize those staffing changes we will need 6.0 FTE to address needs at the K – 5 level, 4.0 FTE to address needs at the middle school, and 3.0 FTE to address administrative support.

### Facility Improvements

First, the District is required by law to address the priority items identified in the Ten Year Life Safety Audit conducted in October 2016. Fortunately, the expenses for addressing all of the A/B items are estimated not to exceed \$250,000.

Second, beginning in the 2017-2018 school year, the District will need to construct two mobile classrooms at Westbrook. Depending on actual enrollment following next year, additional mobile classrooms may be necessary. In all likelihood as the enrollment matriculates and grows over the next few years, the district will probably have to construct mobile classrooms at Fairview.

Should the District continue to see enrollment growth or even stabilize, additional space will be required over the next decade. This pattern will need to be monitored and a determination will need to be made as to whether the District seeks to add classrooms to Westbrook and Fairview or explore a reconfiguration of grades to alleviate the overcrowding.

## Long Range Facility Outlook

Getting the District's Education Fund into a healthy position for the long-term should be the top priority for the Board of Education and Administration. Once fiscal solvency is secured, attention can be given to investigating the options for addressing facility needs. This process could begin in the next 5-7 years. An exploratory committee can be formed to investigate building expansion versus new facilities. The committee can investigate expansion options at the elementary schools with renovations to Lincoln or new construction and re-configuration at Lincoln.

## Conclusion

Administration recommends actively pursuing an Education Fund Tax Rate Increase at the March 20, 2018 election. Hopefully, it will pass on the first attempt. If not, we recommend going back to the community at the November 6, 2018 election. Further, Administration recommends that a consultant be secured to guide the District in the process.

# Mount Prospect School District 57 Office of the Assistant Superintendent for Finance and Operations

| TO:   | Dr. Elaine Aumiller, Superintendent   |
|-------|---|
| FROM: | Adam Parisi, Assistant Superintendent for Finance and Operations                |
| DATE: | January 19, 2017  |
| RE:   | Student Fees for the 2017-18 School Year<br>Policy 4:140 Waiver of Student Fees |

#### **EXECUTIVE SUMMARY:**

Annually, the subject of a schedule for student fees for the upcoming school year is addressed by the Board with respect to the following categories: curriculum, supplies and other fees, transportation, extracurricular, lunch program, summer school, preschool, and child care. The need to receive timely approval of such a schedule is required to begin planning for the next school year's registration process.

#### **BACKGROUND AND RATIONALE:**

Exhibit A is the recommended fee structure for the 2017-18 school year. This fee structure is based upon the fundamental belief that student fees shall cover the cost, or a portion thereof, associated with providing textbooks, instructional supplies and materials, athletics, clubs, performing arts, lunch, and transportation services. It should be recognized that families may also make payments to third-parties for individual user requests as a result of student participation or family purchases. Examples of third-party payments include, but are not limited to, band/orchestra workbooks, photography packages, and student accident insurance.

#### **Curriculum Fees**

The fee contributes to covering the direct costs of instructional materials and consumables, which may include, but are not limited to:

- consumable workbooks;
- nonconsumable textbooks;
- assignment notebooks; and
- duplicating printer paper and supplies.

The recommendation is to maintain the tiered fee structure for the 2017-18 school year, recognizing the differing costs of educating students at three different grade level centers. In an effort to encourage timely payment and provide assistance with the processing of registration, fees are discounted by \$25 per student for those families registering by June 12, 2017. This is an extension from the previous year.

#### **Supplies and Other Fees**

The district charges families for individual user supplies and other fees often associated with various school activities/functions. These items tend to be grade specific, require standardization, and may not necessarily be included in the fee schedule approved by the Board annually. The fee charged to families will be the anticipated cost rounded up to the nearest dollar to keep fees in whole amounts. These fees include, but are not limited to, the following items:

- music/band supplies,
- PE uniform,
- field trip activity cost,
- combination padlock for hallway and PE lockers,
- middle school yearbook, and
- graduation fee.

#### **Transportation Fees**

According to recent data, the district is transporting approximately 828 students. The bus fee is district wide per student with a \$75 discount if paid in full by June 12, 2017. Administration is recommending maintaining a two payment plan. The district is required to provide free transportation to special needs students who require transportation as part of their Individualized Education Program (IEP).

The district charges a transportation fee for field trips that a teacher may elect for their class. This fee is in addition to the field trip activity cost. Fees for field trips will vary and it is required that the cost of the service be covered by the class/group and/or school requesting transportation.

#### **Extracurricular Fees**

Activity fees have been structured into three categories: 1) interscholastic athletics, 2) intramural athletics and clubs, and 3) performing arts. These activities represent enrichment opportunities for individual students and, therefore, the intent is to have participating students' families contribute to cover the total activity program costs. Based on enrollment, at times the district may need to subsidize a portion of the cost of running the activity programs. Furthermore, this activity fee structure gives recognition to the fact that some categories cost more than others to provide. However, the overall intent is to provide an affordable wide range of activity programs.

- <u>Interscholastic Athletics</u>: A fee per activity will be charged to each student participating in the following middle school activities: cross country, basketball, pom pons, wrestling, girls volleyball, and track.
- <u>Intramural Athletics and Clubs</u>: A fee per activity will be charged to each student participating at all grade levels. Fees for activities are based on approximately 15-20 hours of participation for students. Any supply costs to operate the activity is the responsibility of the individual school budget and requires principal approval. Given the service nature, a select number of activities will be deemed as non-fee activities.
- <u>Performing Arts</u>: A fee per activity will be charged to each student participating in band, orchestra, and choral programs at all grade levels.

#### Lunch Program Fees

District 57 has an intergovernmental agreement with Arlington Heights School District 25 to provide and manage the middle school lunch program. Based on communications with the District 25 director of food service, it is reasonable for District 57 to increase its daily lunch fee by \$0.10 per tier. Milk is included with all meals or can be purchased separately. All students may purchase milk on a daily basis or grades 1-5 may purchase an annual milk pass.

#### **Summer School Fees**

The district offers an Extended School Year (ESY) program for students with an Individualized Education Program (IEP) and exploring learning opportunities for English Language Learning (ELL) students through a grant. The district continues to offer a fee based summer band and orchestra program.

#### **Preschool Fees**

The tuition portion of the Circle of Friends program is intended to cover costs of personnel and curriculum materials used in the program. The registration fee is nonrefundable once a student is accepted into the program. A supply fee is charged to all participants for supplies utilized in the program. Special education students are not charged tuition or a registration fee for this program. The district offers a payment plan for families seeking financial assistance.

#### **Child Care Fees**

The fee structure for the Kids' Corner program is focused on operating the program efficiently and attempting to cover all costs (direct <u>and</u> indirect). The program is operated before and after school for

grades K-5. A full-time rate is for families intending to utilize the program on a regular basis three or more days per week. A part-time rate is for those families intending to utilize the program on a regular basis two or less days per week. Kids' Corner services are offered on days school is in attendance, however, only the morning session on half days. Exhibit B summarizes revenues and expenditures from the 2015-16 school year.

#### Other Miscellaneous Student Fee Information

• Student Fee Waiver Program

The district offers a student fee waiver program in order that no student is denied educational services or academic credit due to the inability of parents/guardians to pay student fees. A student shall be eligible for a fee waiver after completion of the application process and when the student currently lives in a household that meets the School-Based Child Nutrition Programs free meal guidelines administered by the United Stated Department of Agriculture. Student fees eligible to be waived include: curriculum, transportation, field trip activity and bus, extracurricular, recorder, music/band supplies, PE uniform, combination padlock, and graduation. Ineligible fees for a student fee waiver include: yearbook, lunch program (separate application process required), summer band/orchestra, preschool, child care, musical instrument cost, and other nominal optional fees as a result of student voluntary participation in a program.

Free and Reduced Priced Lunch Program

The district participates in the National School Lunch Program and the Illinois Free Lunch/Special Milk Program for grades 1-8. A student's eligibility for free and reduced-price food service shall be determined by the income eligibility guidelines, family-size income standards, set annually by the U.S. Department of Agriculture and completion of the application process distributed by the Illinois State Board of Education. One such provision requires the district to provide a sack lunch for free qualifying students in grades 1-5.

<u>Collection Services</u>

The district continues to utilize the services of Centurion Service Corporation for collection services on accounts that are past due. The use of Centurion is only after the schools and business office have exhausted internal efforts to collect. The cost of utilizing Centurion is strictly contingent, 50% of the amount collected. Currently, Centurion is in the process of attempting to collect \$22,724 in outstanding fees on behalf of the district.

• <u>Student Accident Insurance</u>

Historically, a student accident insurance program has been offered to parents as District 57 does <u>not</u> carry accident insurance on its students. The current student accident insurance program is administered by Zevitz-Redfield & Associates, Inc. Cost for plans are determined by the insurance provider and assumed by participating families. These costs are not included in the fee schedule; however, details regarding this program are available on the district's website. Enrollment in this program is historically minimal.

#### **RECOMMENDED BOARD ACTION:**

That the Board of Education approve the 2017-18 student fees and accept the administration's recommendations to extend the early discount window and increase the fees associated with the lunch program.

| Kids' Corner Food - WB             | \$2,526.87   |
| Kids' Corner Milk - FV             | \$314.85     |
| Kids' Corner Milk - LP             | \$157.71     |
| Kids' Corner Milk -WB              | \$332.28     |
|                                    |              |
| <u>*Indirect Costs</u>             |              |
| Fairview Electric                  | \$2,766.69   |
| Fairview Gas                       | \$545.60     |
| Fairview Water/Sewer               | \$152.38     |
| Lions Park Electric                | \$2,491.54   |
| Lions Park Gas                     | \$497.10     |
| Lions Park Water/Sewer             | \$146.52     |
| Westbrook Electric                 | \$548.39     |
| Westbrook Gas                      | \$142.11     |
| Westbrook Water/Sewer              | \$40.93      |
| Total                              | \$257,182.77 |
|                                    |              |
| Revenues-Expenditures              | \$262,056.73 |

\*Indirect Costs are based on the total building utility bill divided by the square footage space used by Kids' Corner and the hours used by the program. The indirect costs at Westbrook are lower because less space is used.

#### MOUNT PROSPECT SCHOOL DISTRICT 57 Closed Session Minute Review January 2017

Boards of Education are required to review the minutes of closed sessions every six months. The purpose of a review is to identify those minutes that should remain confidential. Those minutes which no longer require confidential treatment will then be made available for public inspection. Board Legal Counsel recommends holding both minutes and audiotapes for eighteen months before releasing. Board of Education President Joe Sonnefeldt and I reviewed closed session minutes and make the following recommendations:

1. Approve and Release the closed session minutes dated

| February 19, 2015 | April 16, 2015 |
|-------------------|----------------|
| March 19, 2015    | April 30, 2015 |

#### 2. Approve and Hold

The following is a summary of rationale for maintaining some minutes as closed to public inspection until such time as circumstances change:

The following meeting minutes are retained due to subject matter involving personnel, student discipline,

| potential litigation or current contract negotiations. |                            |                      |                    |
|--|----------------------------|----------------------|--------------------|
| February 15, 1995                                      | February 5, 2009           | September 2, 2010    | May 10, 2012       |
| March 2, 1005  | March 5, 2009 8:40pm       | September 23, 2010   | June 21, 2012      |

## Mount Prospect School District 57 Office of the Director of Technology

To: Dr. Elaine Aumiller

From: Trevor Hope, Director of Technology

**Date:** January 19, 2017

**Re:** District Wide Area Network and Broadband Upgrade (Board Policy 6:235 Instruction: Access to Electronic Networks)

## **EXECUTIVE SUMMARY:**

The district's Wide Area Network (WAN) and Internet contracts with AT&T are expiring June 30, 2017. The district has received a favorable bid through the Erate process from Unite Private Networks (UPN) for both the WAN and Internet connections.

## **BACKGROUND AND RATIONALE:**

*CLIENTFIRST* Technology Consulting was retained by the District to facilitate a competitive selection process for an upgraded Wide Area Network (WAN) that would meet Federal Erate reimbursement requirements for the selection of these types of data networking services.

Proposals were received from AT&T, Comcast, Longway Broadband Services, Sunesys, United Private Networks and Wide Open West (WOW). One, five and seven year proposals for internet were solicited as well as 10 and 20 years for WAN proposals.

Administration, in agreement with the district's Erate consultant, ClientFirst, is recommending the Board approve UPN's bid for a 1GB internet connection, with a seven-year agreement, and leased dark fiber WAN connections, with a 10-year agreement.

Monthly costs with AT&T are currently \$8,766 per month for WAN and internet. UPN costs are projected to be \$6,500 per month for WAN and internet.

Please see the attached recommendation from *CLIENTFIRST* Technology Consulting for more information.

This will be budgeted and come out of the Technology Data Lines district budget. The contracts have been reviewed by the district's lawyers.

## **RECOMMENDED BOARD ACTION:**

That the Board of education approve: The bid from Unite Private Networks for leased dark fiber and internet service starting July 1, 2017.

January 12, 2017

Mr. Trevor Hope Director of Technology Mount Prospect School District 57 701 W. Gregory Mount Prospect, IL 60056

### Re: Internet and Wide Area Network Request for Proposals - Recommendation

Dear Trevor:

*CLIENTFIRST* Technology Consulting was retained by Mount Prospect School District 57 to facilitate a competitive selection process for the procurement and installation of Internet and Wide Area Network (WAN) services. The WAN services will connect the District's schools together electronically, and provide a bridge to the Internet. Internet connection services are also part of the Request for Proposals (RFP). We worked closely with the District's technology department in the development and issuance of RFP documents, and the subsequent validation of a qualified vendor.

As the facilitator of the team, *CLIENTFIRST* fully supports the recommendation of Unite Private Networks - Illinois, LLC, in the total proposed amount of \$721,980 for seven years of Internet services and 10 years of WAN service, using leased dark fiber service.

The RFP requested Internet service for five or seven-year terms in two configurations:

- Two 500Mb Internet connections (one at the District office and one at Lincoln School). This configuration provides Internet connectivity across two locations. Both connections will be actively operating.
- 2. One 1Gb Internet connection at the District office. This configuration provides a simplified network design and some cost savings.

The RFP requested WAN service for 10 and 20-year terms. The WAN connects the District Office to Lions Park, Lincoln and Westbrook schools. The District Office already has a connection to Fairview Elementary School via District-owned fiber cabling running in conduit pathway under the parking lot between the two buildings. The longer terms allow vendors to propose a wider variety of connectivity solutions, including dark fiber cabling that the District could lease or own over time.

Leased dark fiber service varies from traditional leased lit WAN service. It offers simple point-topoint fiber between locations, without running through the electronic network of the service provider (telephone company, cable provider or independent fiber provider). The advantages are that the fiber is dedicated to the District, and that the District can increase bandwidth by simply changing equipment at each end. The result will be more economical for the District, both now and in the future.

The recommended proposal is for one 1Gb Internet connection, with a seven-year term of service, and leased dark fiber WAN connections, with a 10-year term. The proposal from Unite Private Networks for Leased Dark Fiber provided good value (second-lowest cost), along with a proven record of accomplishment in other local installations. Unite Private Networks constructed a similar fiber network between Community Unit High School District 214's high schools. The vendor estimates 60 days of construction time after contract approval, which allows the network to be completed before the 2017-2018 school year begins. Other vendors estimated four to six months for construction time.

The work steps that we utilized to assist the team in reaching the recommendation for procurement of the Internet and WAN services were as follows:

- 1. CLIENTFIRST worked with the team to prepare a detailed list of service requirements.
- 2. Working with the District's technology department, *CLIENTFIRST* compared existing preproposal pricing with the District's budget.
- 3. We developed RFP documents that outlined service requirements, and provided potential vendors with service guidelines and installation specifications.
- 4. *CLIENTFIRST* assisted the District's technology department with the responses to vendor questions.
- 5. *CLIENTFIRST* reviewed the RFP responses, and facilitated interviews with two of the vendors, including participating in the interviews.
- 6. Following the vendor interviews, ClientFirst worked with District staff to review pricing, and vendor qualifications, and develop a balanced evaluation of the vendor solution. The evaluation scoring below was based on price, technical functionality, references and experience, service and support, and completeness and accuracy of proposal.
- 7. The following table summarizes the responses, and the proposal pricing amounts.

| Vendor                                     | Proposal Pricing<br>7 Year Internet<br>and 10 Year WAN | Evaluation<br>Points |
|--|--|----------------------|
| Unite Private Networks – Leased Dark Fiber | \$721,980.00   | 93.1                 |
| WOW Business – Leased Dark Fiber           | \$681,259.20   | 90.5                 |
| Unite Private Networks – Leased Lit Fiber  | \$808,945.00   | 90.0                 |
| Sunesys – Leased Dark Fiber                | \$1,451,800.00   | 79.8                 |
| Sunesys – Leased Lit Fiber                 | \$1,718,196.48   | 77.8                 |
| Comcast                                    | \$1,838,462.40   | 75.6                 |
| WOW Business – Leased Lit Fiber            | \$1,810,859.16   | 71.8                 |
| Longway Broadband Services                 | \$10,908,432.00  | 51.9                 |
| AT&T                                       |  | 39.0                 |

Note: AT&T's pricing information was incomplete in the proposal.

Based on our review of the RFP responses and validation, *CLIENTFIRST* recommends Unite Private Networks to furnish and install the specified Internet and WAN services for the Mount Prospect School District 57.

If you have any questions, feel free to contact me at 630.656.7366 or via email at cwilliams@clientfirstcg.com for additional information. We appreciate the continued opportunity of serving the Mount Prospect School District 57.

Sincerely,

Craig Williams, RCDD, NTS Director Infrastructure Consulting Services

CLIENTFIRST TECHNOLOGY CONSULTING

Unfinished Business Item 1

# **MEMORANDUM**

| To:   | Members, Board of Education |
|-------|-----------------------------|
| From: | Elaine Aumiller             |
| Re:   | Policies First Read         |
| Date: | December 15, 2016           |

The following policies came before the Board of Education for First Read on December 15, 2016. There were no edits or revisions following that discussion. The Board is asked to approve these policies during Unfinished Business on January 19, 2017.

| Policy # | Title  | Explanation  |
|----------|--|--|
| 2:30     | School District Elections                              | Policy is unchanged. Recommendation is to adopt PRESS.   |
| 2:120    | Board Member Development                               | Policy and footnotes are updated in response to recent legislation. Recommendation is to adopt PRESS minus optional section on PD.                                     |
| 2:125    | Board member Compensation; Expenses                    | Renamed and Rewritten to inform the general public<br>that school board members are volunteers and serve<br>without compensation. Recommendation is to adopt<br>PRESS. |
| 2:200    | Types of School Board Meetings                         | Policy is updated to reflect new language in the Open Meetings Act. Recommendation is to adopt PRESS.  |
| 2:220    | School Board Meeting Procedure                         | Policy and footnotes are updated in response to changes in legislation. Recommendation is to adopt PRESS.  |
| 2:250    | Access to District Public Records                      | Policy is unchanged. Recommendation is to adopt PRESS.   |
| 2:260    | Uniform Grievance Procedure                            | This policy is not in the PRESS packet. The policy<br>must be revised to reflect reference to current<br>administration (Adam Parisi).                                 |
| 3:40     | Superintendent   | Policy is unchanged. Recommendation is to adopt PRESS.   |
| 3:50     | Administrative Personnel Other Than the Superintendent | Policy is unchanged. Recommendation is to adopt PRESS.   |
| 4:10     | Fiscal and Business Management                         | Policy is unchanged. Recommendation is to adopt PRESS.   |

| 4:30  | Revenue and Investments                                   | This policy is not in the PRESS packet. The policy must be revised to change reference from Township Treasurer to District Treasurer.  |
|-------|---|--|
| 4:55  | Use of Credit and Procurement Cards                       | Recommendation is to keep current policy. Items 2, 3, 4, and 6 have customized language to D57.  |
| 4:60  | Purchases and Contracts                                   | Policy is updated to incorporate amendments to criminal history records check requirements. Recommendation is to adopt PRESS.  |
| 4:80  | Accounting and Audits                                     | Recommendation is to keep current policy. Customized language has been added to current policy in the sections of <i>Disposition of District Property</i> and <i>Controls for Revolving Funds and Petty Cash</i> . |
| 4:110 | Transportation  | Recommendation is to keep current policy containing<br>customized language in first paragraph. Language<br>addressing new foster care student transportation<br>requirements will be added.                        |
| 4:130 | Free and Reduced-Priced Food Services                     | Policy is unchanged. Recommendation is to adopt PRESS.   |
| 4:150 | Facility Management and Building Programs                 | Recommendation is to keep current policy containing<br>customized language under sections <i>Standards for</i><br><i>Managing Building and Grounds</i> and <i>Naming</i><br><i>Buildings and Facilities.</i>       |
| 4:170 | Safety  | Policy is unchanged. Recommendation is to adopt PRESS w/o section Soccer Goal Safety.  |
| 4:175 | Convicted Child Sex Offender; Screening;<br>Notifications | Policy is updated to incorporate amendments to criminal history records check requirements. Recommendation is to adopt PRESS.  |
| 5:10  | Equal Employment Opportunity and Minority Recruitment     | Policy is unchanged. Recommendation is to adopt<br>PRESS but keep current policy language referencing<br>Nondiscrimination Coordinator and Complaint<br>Managers.  |
| 5:30  | Hiring Process and Criteria                               | Policy is updated to reflect the Right to Privacy in the Workplace Act. Recommendation is to adopt PRESS.  |
| 5:60  | Expenses  | Policy is rewritten in response to the Local Government<br>Travel Expense Control Act. Recommendation is to<br>adopt PRESS.  |
| 5:100 | Staff Development Program                                 | Policy reflects no substantive changes. Content is not changed. Recommendation is to adopt PRESS.  |
| 5:125 | Personal Technology and Social Media; Usage and Conduct   | Policy is updated in response to PRESS feedback.<br>Recommendation is to adopt PRESS w/o optional<br>statement identifying specific types of laptops and<br>digital devices.                                       |

| 5:190 | Teacher Qualifications    | Policy is updated to align with current teacher<br>qualification requirements under ESSA.<br>Recommendation is to adopt PRESS.   |
|-------|---------------------------|--|
| 5:260 | Student Teachers          | Policy is updated to incorporate amendments to<br>criminal history records check requirements.<br>Recommendation is to adopt PRESS and keep current<br>policy language in first paragraph referencing student<br>teacher video recording responsibilities. |
| 5:280 | Duties and Qualifications | Policy is unchanged. Recommendation is to adopt PRESS.   |

\* IASB policies are on an automatic 5 year review cycle regardless of any legislative change. There are no 5 year review policies in this packet.
