

You can read the following instructions to students before you administer the MAP Growth assessments. These instructions are generalized to apply to various MAP Growth tests.

## General MAP Testing – All Grades

*Give this test your best effort. You will have enough time to read and answer all the questions. Some questions will be easy, and others will be more difficult. You cannot get all the answers correct, but that is okay. If you really do not know the answer to a question, then ask yourself which answers are definitely wrong, and then choose from the other answers. You DO need to answer ALL questions.*

*Before you finish a question, you may change your mind and pick a different answer. But, once you move to the next question, your answer is locked, and you cannot go back to the question you have already answered.*

*I am here to help when there is a problem with the test. Please raise your hand if any of these things happen:*

- *If the computer asks for your name, but your name does not appear in the list*
- *If you have headphones, but you do not hear sound when the test begins*
- *If a question appears to be missing answers, questions, or instructions*

## Mathematics Testing – Grades 2–5 and 6+

*On some (but not all) test questions, a calculator tool appears at the top. You can click the calculator picture to open an on-screen calculator that helps you answer the question.*

*If you are unsure about a word in a question, raise your hand for help. I can pronounce the word for you, but I cannot tell you what the word means or explain any math symbols.*

## Reading and Language Usage Testing – Grades 2–5 and 6+

*If a reading passage is too long to fit on the screen, use the scroll bar on the right side of the passage to scroll down and display the rest of the passage and questions about it.*

*Sometimes the same passage appears again and again, but look carefully, because you will see a different question for the same passage.*
